AGENTIC AI DOCUMENT FORENSICS INVESTIGATION REPORT

Contextual Document Authenticity & Tamper Anomaly Analysis System

Investigation ID:	INV-2D1B7473	**Generated:**	2026-11-08 09:09:05 UTC
System Finding:	**Potentially Tampered / High Risk**	**Decision Status:**	**Reviewed: Confirmed Tampered**

LEGAL & FORENSIC ADVISORY: *This report compiles automated findings from deep learning and contextual language models (MobileNetV2, YOLOv8, Qwen-2.5, Sentence-BERT). Detected anomalies, visual bounding boxes, and cross-document inconsistencies highlight areas warranting closer examination.* ***Model predictions do not constitute conclusive proof of fraud.*** *Final determination remains strictly under authorized human investigator control.*

1. Executive Summary

A total of **2** document(s) and **2** page(s) were examined. The visual forensics pipeline identified **2** potentially manipulated region(s). The contextual agent evaluated key entities, and cross-document comparison detected **0** potential contradiction(s). Overall, **5** evidence items were mapped.

2. Document Overview & Visual Forensics

Document Name	Pages	Classification	Tamper Score	Suspicious Regions
DOC-9306BDBE_test_doc_original.png	1	**Potentially Tampered**	0.9500	0
DOC-C51A2D9D_test_doc_altered.png	1	**Potentially Tampered**	0.9500	2

3. Contextual and Entity Findings

Extracted Entities: 2 identified.
Contextual Anomalies:
• Malformatted date token detected in DOC-C51A2D9D_test_doc_altered.png (p.1): possible OCR error or altered date string.

4. Cross-Document Comparisons & Contradictions

Doc A	Doc B	Semantic Sim.	Findings / Status
DOC-9306BDBE_test_doc_original.png	DOC-C51A2D9D_test_doc_altered.png	0.9785	Near-Duplicate / Successive Revision

5. Mapped Evidence Registry

ID	Document & Page	Type	Conf.	Source Text / Details
EVIDENCE_1	test_doc_original.png (p.1)	Document-level classification	N/A	MobileNetV2 classification assigned a score of 0.9482 (decision threshold:
EVIDENCE_2	test_doc_altered.png (p.1)	Potentially suspicious visual region	N/A	YOLOv8 detected a localized visual anomaly with 44.6% confidence.
EVIDENCE_3	test_doc_altered.png (p.1)	Potentially suspicious visual region	N/A	YOLOv8 detected a localized visual anomaly with 37.6% confidence.

EVIDENCE_4	test_doc_altered.png (p.1)	Document-level classification	N/A	MobileNetV2 classification assigned a score of 0.9378 (decision threshold:
EVIDENCE_5	Cross-Document Context (p.1)	Contextual Anomaly	N/A	Malformatted date token detected in DOC-C51A2D9D_test_doc_altered.png (p.1)

6. Investigator Review & Final Human Sign-off

STATUS: OFFICIALLY ADJUDICATED & SIGNED — Formal human forensic review completed and recorded in the audit log.

Investigator Name:	**Senior Investigator Alex Vance**	**Review Date:**	**2026-11-08 09:09 UTC**
Final Disposition:	[ ] Verified Authentic **[X] Confirmed Tampered** [ ] Inconclusive	**Signature:**	Senior Investigator Alex Vance DIGITALLY CERTIFIED • DEE39F3B21 • VERIFIED
Investigator Notes:	**Pixel artifact analysis and discrepancy in Serum Creatinine between documents confirms intentional alteration of medical record.**
