AGENTIC AI DOCUMENT FORENSICS INVESTIGATION REPORT

Contextual Document Authenticity & Tamper Anomaly Analysis System

Investigation ID:	INV-6CA2FD2C	**Generated:**	2026-11-08 15:44:29 UTC
System Finding:	**Likely Authentic / Low Anomaly**	**Decision Status:**	**Pending Human Investigation**

LEGAL & FORENSIC ADVISORY: *This report compiles automated findings from deep learning and contextual language models (MobileNetV2, YOLOv8, Qwen-2.5, Sentence-BERT). Detected anomalies, visual bounding boxes, and cross-document inconsistencies highlight areas warranting closer examination.* ***Model predictions do not constitute conclusive proof of fraud.*** *Final determination remains strictly under authorized human investigator control.*

1. Executive Summary

A total of **1** document(s) and **1** page(s) were examined. The visual forensics pipeline identified **0** potentially manipulated region(s). The contextual agent evaluated key entities, and cross-document comparison detected **0** potential contradiction(s). Overall, **1** evidence items were mapped.
