AGENTIC AI DOCUMENT FORENSICS INVESTIGATION REPORT

Contextual Document Authenticity & Tamper Anomaly Analysis System

Investigation ID:	INV-B4EFDC7A	**Generated:**	2026-11-08 09:16:38 UTC
System Finding:	**Potentially Tampered / High Risk**	**Decision Status:**	**Reviewed: Verified Authentic**

LEGAL & FORENSIC ADVISORY: *This report compiles automated findings from deep learning and contextual language models (MobileNetV2, YOLOv8, Qwen-2.5, Sentence-BERT). Detected anomalies, visual bounding boxes, and cross-document inconsistencies highlight areas warranting closer examination.* ***Model predictions do not constitute conclusive proof of fraud.*** *Final determination remains strictly under authorized human investigator control.*

1. Executive Summary

A total of **2** document(s) and **2** page(s) were examined. The visual forensics pipeline identified **0** potentially manipulated region(s). The contextual agent evaluated key entities, and cross-document comparison detected **0** potential contradiction(s). Overall, **2** evidence items were mapped.

2. Document Overview & Visual Forensics

Document Name	Pages	Classification	Tamper Score	Suspicious Regions
DOC-47717D97_sample_salary_slip.pdf	1	**Potentially Tampered**	0.9500	0
DOC-3731A2A6_sample_bank_statement.pdf	1	**Potentially Tampered**	0.9500	0

3. Contextual and Entity Findings

Extracted Entities: 8 identified.

4. Cross-Document Comparisons & Contradictions
