AGENTIC AI DOCUMENT FORENSICS INVESTIGATION REPORT

Contextual Document Authenticity & Tamper Anomaly Analysis System

Investigation ID:	INV-TEST-001	**Generated:**	2026-11-08 10:19:00 UTC
System Finding:	**Potentially Tampered / High Risk**	**Decision Status:**	**Pending Human Investigation**

LEGAL & FORENSIC ADVISORY: *This report compiles automated findings from deep learning and contextual language models (MobileNetV2, YOLOv8, Qwen-2.5, Sentence-BERT). Detected anomalies, visual bounding boxes, and cross-document inconsistencies highlight areas warranting closer examination.* ***Model predictions do not constitute conclusive proof of fraud.*** *Final determination remains strictly under authorized human investigator control.*

1. Executive Summary

A total of **2** document(s) and **2** page(s) were examined. The visual forensics pipeline identified **1** potentially manipulated region(s). The contextual agent evaluated key entities, and cross-document comparison detected **0** potential contradiction(s). Overall, **4** evidence items were mapped.

2. Document Overview & Visual Forensics

Document Name	Pages	Classification	Tamper Score	Suspicious Regions
test_doc_original.png	1	**Likely Authentic**	0.0615	0
test_doc_altered.png	1	**Likely Authentic**	0.0616	1

3. Contextual and Entity Findings

Extracted Entities: 2 identified.
Contextual Anomalies:
• Malformatted date token detected in test_doc_altered.png (p.1): possible OCR error or altered date string.

4. Cross-Document Comparisons & Contradictions

Doc A	Doc B	Semantic Sim.	Findings / Status
test_doc_original.png	test_doc_altered.png	0.9785	Near-Duplicate / Successive Revision

5. Mapped Evidence Registry

ID	Document & Page	Type	Conf.	Source Text / Details
EVIDENCE_1	test_doc_original.png (p.1)	Document-level classification	N/A	MobileNetV2 classification assigned a score of 0.0615 (decision threshold:
EVIDENCE_2	test_doc_altered.png (p.1)	Potentially suspicious visual region	N/A	YOLOv8 detected a localized visual anomaly with 44.6% confidence. Correspon
EVIDENCE_3	test_doc_altered.png (p.1)	Document-level classification	N/A	MobileNetV2 classification assigned a score of 0.0616 (decision threshold:

EVIDENCE_4	Cross-Document Context (p.1)	Contextual Anomaly	N/A	Malformatted date token detected in test_doc_altered.png (p.1): possible OC

6. Investigator Review & Final Human Sign-off

This section must be completed and signed by an authorized forensic investigator.

Investigator Name:	_____	**Review Date:**	____/____/_____
